Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed 07/3/01 and 5/10/02 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 1-36** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding independent claims 1 and 18, respectively, each recites measuring at least two responses, wherein one of the measured response is a reference response. For examination

purposes, it is unclear to the examiner, what is the difference between the reference response and a measure response, since both are measured. Thus, the claim language is indefinite.

Claim 1, lines 10, "selecting the or each" is indefinite claim language.

Claim 18, lines 13, "selecting the or each" is indefinite claim language.

Regarding claims 2-17, and 19-36, the claims depend for the independent claims above.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. **Claim 37** is rejected under 35 U.S.C. 102(e) as being anticipate by Huopaniemi, U. S.

Patent No. 6343131.

Regarding claim 37, Huopaniemi discloses a method and system for processing a virtual acoustic environment. Huopaniemi indicates measuring diffusivity by in a sound field based of the coeffiecents, wherein when a sound from a sound source is observed or measured as various points within the acoustic environment and are processed via filters, such as the sound may propagate to particular area of the room in which may be measured, which the point of the listener, sound is reflected as well from the wall and/or a window within that environment (col. 3, lines 45-56), which indicates measuring responses of an acoustic device at a reference position

and at a comparison positions, thus a correlation may be determined by the coefficients of the filter in response to the reflections (col. 8, lines 28-31, col. 11-27).

7. **Claims 1-36** would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
